this specialist book is a comprehensive practical reference work in the field of industrial powder coating it offers a systematic and complete description of the fundamentals applications and procedures for the safe control of processes the methods of paint production properties of the powder paint types application technology and measurement and test methods are clearly presented and dealt with in detail in addition the pretreatment as well as the trouble shooting in the case of paint defects and their avoidance form the

focus of this book the present edition has been completely revised and the environment chapter has been added

the new handbook on basics of coating technology is a classic reference recently updated with 18 years worth of new technology standards and developments in the worldwide coating industry this is an indispensable reference for anyone in the industry whether you are involved in traditional processes or the most innovative this handbook will be a critical addition to your daily routine full of color images graphs and figures the handbook comes complete with standard tables general classification figures definitions and an extensive keyword index both engineers and technicians will find the answers they need within its pages instead of solving problems after the fact this handbook helps avoiding them in the first place saving time and money this reference also gives beginners and practically oriented readers a journey through the different coating segments clearly illustrated with lots of pictures it also outlines the social changes in the industry concerning environmental compatibility and toxicology which have seriously affected product development

the conservation of metallic archaeological and historic artefacts is a major challenge whether they are ancient bronzes or relics of our more recent industrial past based on the work of working party 21 corrosion of archaeological and historical artefacts within the european federation of corrosion etc this important book summarises key recent research on analytical techniques understanding corrosion processes and preventing the corrosion of cultural heritage metallic artefacts after an introductory part on some of the key issues in this area part two reviews the range of analytical techniques for measuring and analysing corrosion processes including time resolved spectroelectrochemistry voltammetry and laser induced breakdown spectroscopy part three reviews different types of corrosion processes for a range of artefacts whilst part four discusses on site monitoring techniques the final part of the book summarises a range of conservation techniques and strategies to conserve cultural heritage metallic artefacts corrosion and conservation of cultural heritage metallic artefacts is an important reference for all those involved in archaeology and conservation including governments museums as well as those undertaking research in archaeology and corrosion science summarises key research on analytical techniques for measuring and analysing corrosion processes provides detailed understanding of corrosion processes and corrosion prevention discusses on site monitoring techniques

this chapter discusses the importance of using standards in conservation methodology and practice for cultural heritage ch metals the past general trend in the field is the use of metal industry standards the chapter surveys the relevant scientific publications and concludes

that conservation researchers use a variety of these standards adopted by different organisations as a result it can be difficult to compare scientific data for ch metal studies carried out by different laboratories the chapter discusses the necessity to draft new standards for metals specific for ch by examining how three independent researchers had different findings when testing the same coating the role of cen tc 346 conservation of cultural heritage is also discussed
